

UVeye Australia

Hostile Vehicle Mitigation

HIGH RESOLUTION:

As the innovation leader in Hostile Vehicle Mitigation, UVeye Australia provides high resolution images of the undercarriage of scanned vehicles, which guarantees best in security standards.

VIEW FULL IMAGE:

With its innovative technology, UVeye Australia displays the full undercarriage (incl. door sills / running boards) of scanned vehicles in one high resolution picture, which allows continuous zooming in finer details.

CLEAR COLOUR IMAGES:

For state-of-the-art security standards UVeye Australia provides crystal clear colour images, which is vital in today's to secure safety at any kind of gate.

AUTOMATIC FOREIGN OBJECT DETECTION:

UVeye Australia provides automatic identification of foreign objects or modification to a vehicle's undercarriage and highlights these changes to assist the guards for fast inspection.

UVEYE AUSTRALIA AS PERMANENT SYSTEM:

UVEye Australia is a permanent system and is available with guiding axels or heavy duty cover. With the high quality stainless steel heavy duty cover, the UVEye Australia under vehicle inspection system is ideal as permanent installation. The heavy duty housing offers the best possible protection for the technology inside.

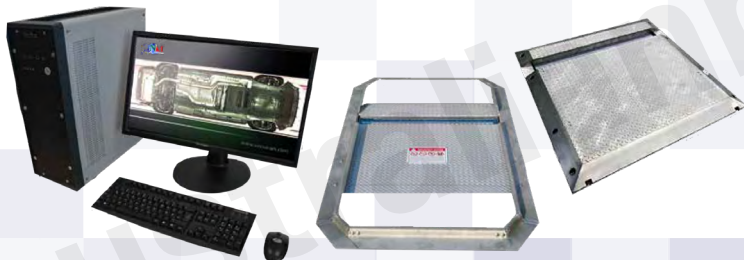

- Used for sophisticated safety inspections in connection with a comprehensive access control system
- Easy to install – mounts into the road surface with little constructional effort

UVEYE AUSTRALIA AS MOBILE SYSTEM:

UVEye Australia under vehicle inspection system as a mobile version is ideal for rentals, special events, pilots and demos. It is available with two different kinds of ramps: The UVEye Australia system with rubber pads is simple to install. The solid rubber pads can be bolted to the road surface for semi-permanent installation. The UVEye Australia system with aluminum ramps is even easier to install. The aluminum ramps are light and easy to carry for rapid deployment and ideal for special events:

- For flexible safety controls at changing inspection sites
- Fast assembly, fast disassembly and uncomplicated transport
- For all vehicle weight classes and track widths
- Available with light aluminum ramps or very robust rubber pads

AUSTRALIAN BOLLARDS AS OPTIONS:

UVeye Australia Automatic Number Plate Recognition System (ANMR):

The UVeye Australia Automatic Number Plate Recognition (ANPR) decodes all kinds of vehicle plates with high speed and precision.

UVeye Australia Driver Camera

UVeye Australia provides different kinds of solutions to take an image of the driver.

UVeye Australia Automatic Number Plate Recognition System (ANMR):

The integrated UVeye Australia Scene Camera creates e.g. a top-view-photo of the vehicle while driving through the inspection area. With this solution the operator is able to check the roof of trucks and other vehicles for contrabands and unauthorised persons, which are trying to hide.

WORLD WIDE EXPERIENCE:

As the innovation leader UVeye Australia is currently used successfully in almost 50 countries worldwide, from the extreme cold of Northern Europe to the extreme heat of the Middle East. Since 200, UVeye Australia supplies under vehicle inspection systems to distributors, system integrators and installers all over the world. UVeye Australia systems are installed at facilities of a wide range of end users, which include many governmental, military and private organisations where high security measures are simply a must.
